

Pehchaan.me | AI-Powered Career Development Platform for India

Empowering Every Indian Student to Become Job-Ready , Confident & Career - Independent

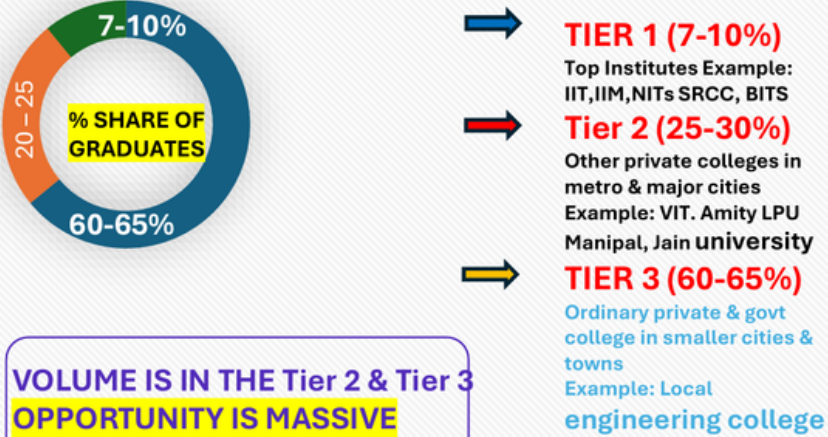

THE LANDSCAPE INDIA'S GRADUATE RIPELINE (ANNUAL)

80 – 85% of graduates comes from Tier 2 & Tier 3 colleges
high in number, low in access to quality career support

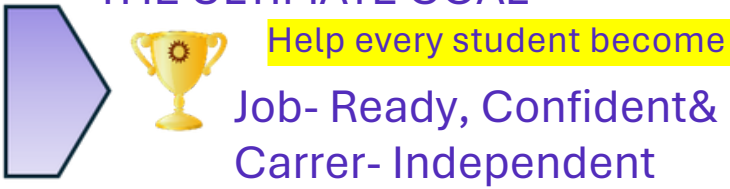

WHERE DO INDIA GRADUATES COMES FROM ?

WHAT DO STUDENTS NEED FOR A JOB ?

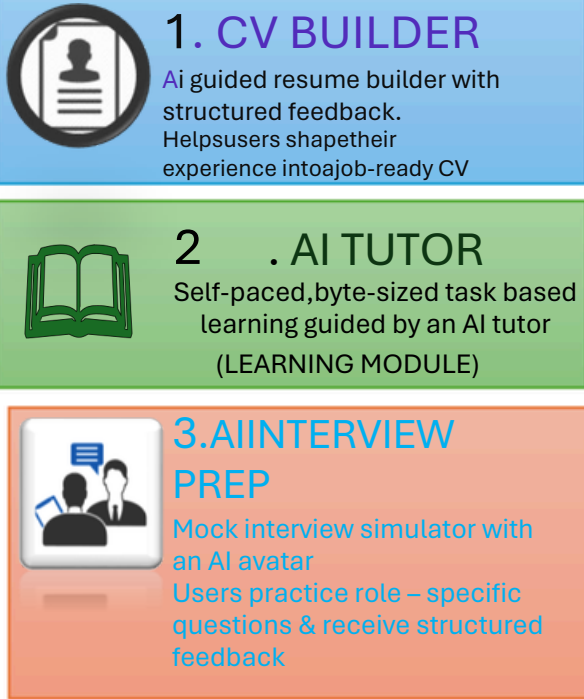

THE ULTIMATE GOAL

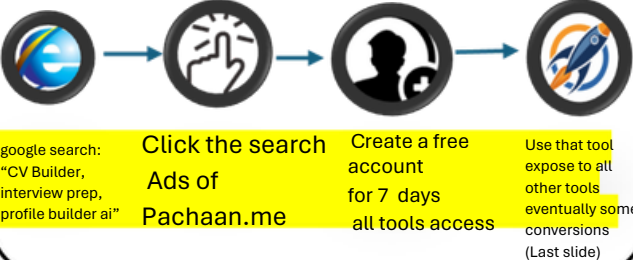

MODULE FITMENT ACROSS STUDENT SEGMENTS (At a Glance) 1&2 = VERY LOW NEED , 5 = High need

MODULES	ENGINEERING & MBA			NON – ENGINEERING STUDENT		
	TIER - 1	TIER – 2	TIER - 3	TIER - 1	TIER – 2	TIER- 3
CV BUILDER	Least need (1)	Moderate they have good faculty (3)	High need don't know how to make it (5)	More than moderate need basic guidance available (4)	Moderate need some support exist(3)	High need (5)
AI TUTOR	Least need(1)	Least need (2) have activities	high need low faculty interaction(5)	High need limited exposure (4)	High need lack of strong academic (5)	High need(5)
Ai INTERVIEW	Need for sip interview and job interview prep (4)	moderate communication gap (4)	High need (5)	Very high need no proper guidance	Very high need weak foundation + no mentoring support	High need

Our solution- **pehchaan.me**
An AI platform built for first time job seekers in india

Customer Journey

Pehchaan.me (1) Unlocking the Tier 3 'Blue Ocean' Talent Opportunity

ENG/ MBA

NON- ENG

TIER – 1 (URBAN ELITES)	TIER - 2 (RISING MIDDLE)	TIER – 3 (UNDERSERVED CORE)
 Aarav Mehta(IIT Delhi) High awareness, but struggles to differentiate his CV from 500 other high-achievers. Pehchaan.me solution CV Builder Ai Tutor	 Ishaani Sharma(Amity Univ), Jaipur Recruiters overlook her off-campus applications because her college name lacks "elite" status. Pehchaan.me solution Interview prep	 Rahul Kumar(Govt. College), Gorakhpur "The Guidance Vacuum" High grit and intelligence, but zero access to industry mentors or professional roadmaps. AI Tutor: Acts as a 24/7 mentor, providing a structured career path
 Sanya Iyer (SRCC), Delhi "The Profile Gap" Family background provides exposure, but she lacks the technical "edge" to lead in modern Fintech/Data roles. Ai Tutor: Used byte-sized lessons to bridge the gap	 Vikram Singh (Jain Univ), Bangalore "The Forgotten Majority" Most platforms focus on coders; as a BCom student, he feels the career advice is "one size fits all." AI tutor + cv builder : Practiced client-facing sales and behavioral scenarios	 Amit More(AN College), Bihar "The Language Wall" First-generation learner; smart, but the "Professional English" requirement feels like a locked door. AI tutor + cv + interview prep Learn core job concepts in his native language first, building the confidence to eventually practice in English.

Executive Insight: While Tier 1 is saturated, Tier 2 & 3 students represent a massive "Guidance fills this with zero-marginal-cost , **THE MOST IMPORTANT PART** → While we are considering tier 2 + tier 3 it is VERY IMPORTANT to know that **each of the segment is our customer for different tool**, so we **need to make separate pages for each tool and rank them and run campaigns on them separately** and check which is getting higher conversion to double down on that. **then using the tools as funnel and later selling on basket subscription.**

II. Core Problems & AI-Driven Solutions

why they will pay us?

Because Pehchaan's AI is helping them develop the profile to land on their first job

But only if Pehchaan takes care of these problems:

CV Maker	AI Tutor	Job Role Prep	Retention Problem	Lag Issue
Earlier it was creating duplicate content and repeating same things, making resume non ATS friendly. Also no real time updation.	Users lack guidance (Missing Mentor problem), don't know what to do, where to start, how to reach shortlisting stage.	Same CV and answers don't work for every job, users fail to adapt to job specific requirements.	Very low retention in real world usage of such tools, users drop off early.	Tool lag in communication, sometimes Job Role Prep not interacting properly, breaks user flow.
Builds ATS FRIENDLY Resume with clean, non-repetitive content. Integrated with AI Tutor so as user updates mentor about milestones, CV maker auto updates the resume.	Acts as a mentor-like tool guiding users to build profile — projects, milestones, step by step till getting shortlisted, without this users don't fit in the system.	Understands job need, gives instructions to CV maker to create separate CVs for each role and trains users with job specific questions and answers.	Introduces scoring system and streaks (proven game changer), ~47%+ increase in 90 days. Ranking system, public profiles and field filters also indirectly help in placement.	Needs optimization in backend communication and syncing, approach is good but performance improvement required for smoother and cost efficient experience.

Customer Acquisition Strategy

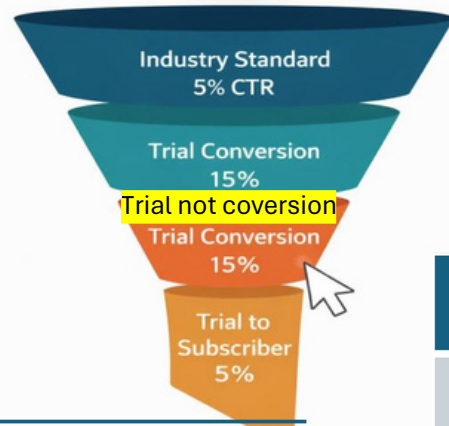

NO experience ? Build your first job ready profile by using Ai

Market Demand & Volume Analysis

Search term	Monthlysearches	Costofper-bid
AI CV MAKER	10 million	2₹ - 35₹
RESUME MAKER	10 million	1₹ - 10₹
AI RESUME MAKER	1 million	1₹ - 33₹
